

Condition 2: corrected N=2 and historical N=1 at T = 3.0M

Minimum terminal duration: 100,000 steps | 512 trials per condition

Retrospective curve: only intervals continuing through the fixed endpoint T count.
The same unit and optimal vector must persist. Shading: pointwise 95% Wilson intervals.
Dashed legacy N=1 has mismatched reset gains; this is not a comparison changing only N.
